

Section	Details
Progress Overview (inkl. Reasons for Deviations of the Plan)	<ul style="list-style-type: none"> <li>✓ KickOff and Assignment Upload</li> <li>📁 Request Access to PASSION dataset <ul style="list-style-type: none"> <li>– Access granted but Switch Drive was down when I wanted to test the access</li> </ul> </li> <li>✓ Prepare timetable</li> <li>📁 Setup LaTeX Base Document</li> <li>✗ Start Literature Review on general ML biases <ul style="list-style-type: none"> <li>– Started writing Problem Statement which helped getting into LaTeX, which took some time away from the Review</li> <li>– Setting up LaTeX templates took longer than expected</li> </ul> </li> </ul>
Accomplishments	<ul style="list-style-type: none"> <li>✓ Setup of the most important documents / templates</li> <li>✓ Report already started</li> <li>✓ Tasks for first phase are clear</li> </ul>
Risks and Measures	<p>Wasting Time on Irrelevant/Poor-Quality Sources</p> <ul style="list-style-type: none"> <li>• prioritizing papers with high citation counts</li> <li>• using systematic strategy as proposed by Ludovic</li> </ul> <p>Missed Citations/Wasted Time Later to Re-Find Papers</p> <ul style="list-style-type: none"> <li>• Writing a summary for each paper directly in the corresponding bib file that includes: key concept, research question, findings and potential section of the thesis where it could be used.</li> <li>• Adding citations immediately while writing in the final report.</li> </ul> <p>Focus Too Much on One Research Topic, Neglecting Others</p> <ul style="list-style-type: none"> <li>• Applying time-boxing: Set time limits for each topic and stick to it.</li> </ul>
Next Steps	<ul style="list-style-type: none"> <li>• Test the Access to PASSION dataset</li> <li>• Finalize Problem Statement (or should this be done later in the process?)</li> <li>• Literature Review according to plan</li> <li>• Fix LaTeX Template</li> </ul>
Discussion Points / Questions	<ul style="list-style-type: none"> <li>• Timetable, especially the allocated time for the individual research topics</li> <li>• How can I fix that the Glossary and Figures List appear as chapters in LaTeX?</li> <li>• Feedback regarding this first report</li> </ul>
Additional Notes	I will be out on Monday, 3.3. due to Lucerne Carneval. I will work instead more during the rest of the week from remote.
Attachments	<ul style="list-style-type: none"> <li>• Timetable</li> <li>• GitHub Repo: <a href="https://github.com/teshi24/BAA">https://github.com/teshi24/BAA</a></li> </ul>
